1. The following is an examiner's statement of reasons for allowance:

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed method as set forth in independent claim 1 that is particularly characterized at least by the claimed method steps of "accessing a round-trip time matrix for a space ..." (lines 2-5) and "repeating for each receive antenna of the one or more receive antennas: establishing a wave form ... identifying a waveform ... combining the waveform values ... generating the image matrix from the image values" (lines 11-18) taken together and taken in the overall context of independent claim 1.

Dependent claims 2-10 are allowable for at least the reasons for which claim 1 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed apparatus as set forth in independent claim 11 that is particularly characterized at least by the claimed "memory operable to store a round-trip time matrix for a space ..." (lines 3-6) and "image generator operable to ... generate the image matrix from the image values" (lines 10-21) taken together and taken in the overall context of independent claim 11.

Dependent claims 12-20 are allowable for at least the reasons for which claim 11 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed computer program product as set forth in independent claim 21 that is particularly characterized at least by the claimed computer-implemented method steps of "access a round-trip time matrix for a space ..." (lines 3-6) and "repeat for at least a subset of the plurality of points to generate an image matrix ... generate the image matrix from the image values" (lines 9-19) taken together and taken in the overall context of independent claim 21.

Dependent claims 22-30 are allowable for at least the reasons for which claim 21 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed apparatus as set forth in independent claim 31 that is particularly characterized at least by the claimed "means for accessing a round-trip time matrix for a space ..." (lines 2-5); "means for repeating ..." (lines 8-17); and "means for generating the image matrix from image values" taken together and taken in the overall context of independent claim 31.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed method as set forth in independent claim 32 that is particularly characterized at least by the claimed method steps of "accessing a round-trip time matrix for a space ..." (lines 2-7); "repeating for at least a subset of the plurality of points to

generate an image matrix ..." (lines 10-34); and "generating the image matrix from the image values" (line 35) taken together and taken in the overall context of independent claim 32.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
